"Shakespeare Saved My Life touches on the search for meaning in life, the struggles that complicate the path to triumph and the salvation that can be found in literature's great works An inspiring account."—Shelf Awareness A female professor, a supermaximum security prisoner, and how Shakespeare saved them both Shakespeare professor and prison volunteer Laura Bates thought she had seen it all. That is, until she decided to teach Shakespeare in a place the bard had never been before -- supermax solitary confinement. In this unwelcoming place, surrounded by inmates known as the worst of the worst, is Larry Newton. A convicted murderer with several escape attempts under his belt and a brilliantly agile mind on his shoulders, Larry was trying to break out of prison at the same time Laura was fighting to get her program started behind bars. Interruptions in Glass
Macbeth by William Shakespeare (Book Analysis)

A surgeon unknowingly damages the intestines of a nurse expecting only an overnight stay after surgery, beginning a chain of more tragic and preventable errors. The consequences result in the nurse spending several weeks on an ICU ventilator in a drug-induced coma, having four additional surgeries, and requiring a pump to drain the raging infection from her open abdomen. As she awakens and tries to come to terms with what happened to her, she realizes the hospital and doctors will never tell her the whole truth; she has to find out what went wrong on her own. In order to heal, she determines to write and share her story so others may learn how infections, adverse events, and medical errors occur frequently in hospitals, sometimes resulting in death. More than a narrative, Anatomy of Medical Errors: The Patient in Room 2 shines light on the dysfunction that underpins many hospital organizations, especially teaching hospitals, including silencing of the patient, provider arrogance, flawed coordination of care, poor communication, and lack of ownership for outcomes. Forever changed by the experience, author Donna Helen Crisp uses her struggles to teach nurses, doctors, and other healthcare professionals how to prevent or avoid potentially dangerous situations, recognize warning signs, and work collaboratively to provide transparent patient care. This book provides an ethical and critical thought process framework for care providers and others through a compelling story about hospital culture. Readers who want to understand how delivery of care works in fast-paced and complex healthcare environments will come away engaged and informed.

Henry Irving

Rev. Vigo Auguste Demant (1893-1983) was a significant theologian and social commentator of the first half of the twentieth century. This book contains his up-until-now unpublished Gifford Lectures, in which Demant provides cultural analysis as he attempts to address why humanity struggles so much with modernity and living in the contemporary world. The lectures have additional notes and commentary to make them comprehensible, since not all of them are complete. The first chapters set Demant in his context and the final section provides assessment of both his ideas and his impact. Although Demant died in 1983, his ideas continue to prove influential to thinkers and theologians today.

Study Guide to Richard II by William Shakespeare

Sleep deprivation is a growing problem worldwide. We go to our doctors for advice, but they seem to have nothing but pills to counteract this predicament, and these quick fixes fail to get to the root of the problem. Buddha's Book of Sleep is the first book to treat sleep disorders from the perspective of mindfulness meditation. Yet this is a natural choice - mindfulness meditation has proven effective for other psychological problems such as stress, depression and anxiety and these very issues are what become sleep problems when our heads hit the pillow. Divided into two sections, this book attacks sleep disorders with a combination of wisdom and practical meditation exercises. The first section describes the reasons why mindfulness meditation's basis in self-awareness is appropriate for dealing with this problem, detailing the practices of this popular form of meditation. The second section contains seven specific exercises to practice at bedtime or in the wee hours of the morning, depending on when sleeping problems occur. Supplying readers with a new perspective on why they cannot fall asleep (even when they feel exhausted), and arming them with easy-to-use tools from the practices of mindfulness meditation, Buddha's Book of Sleep will help the reader calm their hurried thoughts and rest easy.

Anatomy of what We Value Most

Today, book clubs are all the rage, but in the early twentieth century, social groups called “women's clubs” were more popular. These small groups of friends, family and neighbors gathered to discuss topics like history, philosophy, and art. This primer from Caroline French Benton offers plenty of inspiration and practical guidelines.

essays by leading theatre scholars explores each element of Irving's art: his acting, his contribution to the plays he commissioned, his flair for the stage picture, and his ear for incidental music. Like Wagner, Irving was a proponent of a holistic approach to the stage, that is, blending together acting, painting, music, and architecture to create harmonious, balanced, and artistic theatre. Irving emerges not only as the peer of such eminent contemporaries as Tennyson, Sullivan, Shaw, and Burne-Jones, but also as a powerful influence on the twentieth-century theatre.

Since about 1960, when five-act division in Shakespeare's plays was strongly disputed, most critics have focused on individual scenes rather than holistic form. This book argues for Shakespeare's use of five acts, arranged in three cycles to form a 2-1-2 pattern. It also examines the role of multiple plots and centers of consciousness, especially in the festive comedies and romances. Additionally, it traces Shakespeare's gradual mastery of the art of epiphany, compares it to Spenser's complementary focus on transcendent reality, and traces in Macbeth the dark mode of Shakespeare's dramaturgical pattern.

The Gasbag
An ex-convict struggles with his addictive yearning for prison. A law-abiding citizen broods over his pleasure in violent, illegal acts. A prison warden loses his job because he is so successful in rehabilitating criminals. These are but a few of the intriguing stories Martha Grace Duncan examines in her bold, interdisciplinary book Romantic Outlaws, Beloved Prisons. Duncan writes: "This is a book about paradoxes and mingled yarns - about the bright sides of dark events, the silver linings of sable clouds." She portrays upright citizens who harbor a strange liking for criminal deeds, and criminals who conceive of prison in positive terms: as a nurturing mother, an academy, a matrix of spiritual rebirth, or a refuge from life's trivia. In developing her unique vision, Duncan draws on literature, history, psychoanalysis, and law. Her work reveals a nonutopian world in which criminals and non-criminals—while injuring each other in obvious ways—nonetheless live together in a symbiotic as well as an adversarial relationship, needing each other, serving each other, enriching each other's lives in profound and surprising fashion.

Shakespeare Survey is a yearbook of Shakespeare studies and production. Since 1948 Survey has published the best international scholarship in English and many of its essays have become classics of Shakespeare criticism. Each volume is devoted to a theme, or play, or group of plays; each also contains a section of reviews of that year's textual and critical studies, and of the year's major British performances. The books are illustrated with a variety of Shakespearean images and production photographs. The virtues of accessible scholarship and a keen interest in performance, from Shakespeare's time to our own, have characterised the journal from the start. Most volumes of Survey have long been out of print. Backnumbers are gradually being reissued in paperback.

Volume 16, Tome II: Kierkegaard's Literary Figures and Motifs
While Kierkegaard is perhaps known best as a religious thinker and philosopher, there is an unmistakable literary element in his writings. He often explains complex concepts and ideas by using literary figures and motifs that he could assume his readers would have some familiarity with. This dimension of his thought has served to make his writings far more popular than those of other philosophers and theologians, but at the same time it has made their interpretation more complex. Kierkegaard readers are generally aware of his interest in figures such as Faust or the Wandering Jew, but they rarely have a full appreciation of the vast extent of his use of characters from different literary periods and traditions. The present volume is dedicated to the treatment of the variety of literary figures and motifs used by Kierkegaard. The volume is arranged alphabetically by name, with Tome II covering figures and motifs from Gulliver to Zerlina.

In this remarkable collaboration, one of the nation's leading civil rights lawyers joins forces with one of the world's foremost cultural psychologists to put American constitutional law into an American cultural context. By close readings of key Supreme Court opinions, they show how storytelling tactics and deeply rooted mythic structures shape the Court's decisions about race, family law, and the death penalty. Minding the Law explores crucial psychological processes involved in the work of lawyers and judges: deciding whether particular cases fit within a legal rule ("categorizing"), telling stories to justify one's claims or undercut those of an adversary ("narrative"), and tailoring one's language to be persuasive without appearing partisan ("rhetorics"). Because these processes are not unique to the law, courts' decisions cannot rest solely upon legal logic but must also depend vitally upon the underlying culture's storehouse of familiar tales of heroes and villains. But a culture's stock of stories is not changeless. Amsterdam and Bruner argue that culture itself is a dialectically constantly in progress, a conflict between the established canon and newly imagined "possible worlds." They illustrate the swings of this dialectic by a masterly analysis of the Supreme Court's race-discrimination decisions during the past century. A passionate plea for heightened consciousness about the way law is practiced and made, Minding the Law/Tiltie will be welcomed by a new generation concerned with renewing law's commitment to a humane justice. Reflections on a Voyage Appendix: Analysis of Nouns and Verbs in the Prigg, Pitts, and Brown Opinions Notes Table of Cases Index Reviews of this book: Amsterdam, a distinguished Supreme Court litigator, wanted to do more than share the fruits of his practical experience. He also wanted to get student thinkers to think about thinking like a lawyer.To decode what he calls "law-think," he enlisted the aid of the venerable cognitive psychologist Jerome Bruner[and] the collaboration has resulted in [this] unusual book. --James Ryerson, Lingle France Reviews of this book: It is hard to imagine a better time for the publication of Minding the Law, a brilliant dissection of the court's work by two eminent scholars, law professor Anthony G. Amsterdam and cultural anthropologist Jerome Bruner.ISssue by issue, case by case, Amsterdam and Bruner make mincemeat of the court's handling of the most important constitutional issue of the modern era: how to eradicate the American legacy of race discrimination, especially against blacks. --Edward Lazarus, Los Angeles Times Book Review Reviews of this book: This book is a gem/(its thesis) is easily stated but remarkably unrecognized among a shockingly large number of lawyers and law professors: law is a storytelling enterprise thoroughly entrenched in culture.Whereas critical legal theorists have talked among themselves for the past two decades, Amsterdam and Bruner seek to engage all of us in a dialogue. For that, they should be applauded. --Daniel R. Williams, New York Law Review Reviews of this book: In Minding the Law, Anthony Amsterdam and Jerome Bruner show us how the Supreme Court creates the magic of inevitability. They are angry at what they see. Their book is premised on the conviction that many of the choices made in Supreme Court opinions 'lack any justification in the text.'Their method is to analyze the text of opinions and to show how the conclusions reached do not always follow from the logic of the argument. They also show how the Court casts its rhetoric like a spell, mesmerizing its audience, and making the highly contingent shine with the light of inevitability. --Mitchell Goodman, News and Observer (Raleigh, North Carolina) Reviews of this book: What do controversial Supreme Court decisions and classic age-old tales of adultery, villainy, and combat have in common? Everything—at least in the eyes of [Amsterdam and Bruner]. In this substantial study, which is equal parts dense and entertaining, the authors use theoretical discussions of literary technique and myths to expose what they see as the secret intentions of Supreme Court opinions.Studying how lawyers and judges employ the various literary devices at their disposal and noting the similarities between legal thinking and classic tactics of storytelling and persuasion, they believe, can have 'astonishing consciousness-retrieving effects.'The agile minds of Amsterdam and Bruner, clearly storehouses of knowledge on a range of subjects, allow an approach that might sound far-fetched occasionally but pays dividends in the form of gained perspective—and amusement. --Elisabeth Lasch-Quinn, Washington Times Reviews of this book: Stories and the way judges—intentionally or not—categorize and spin them, are as responsible for legal rulings as logic and precedent, Mr. Amsterdam and Mr. Bruner said. Their novel attempt to reach into the psyche of members of the Supreme Court is part of a growing interest in a long-neglected and cryptic subject: the psychology of judicial decision-making. --Patricia Cohen, New York Times Most law professors teach by the 'case method,' or say they do. In this fascinating book, Anthony Amsterdam—a lawyer—and Jerome Bruner—a psychologist—expose how limited most case 'analysis' really is, as they show how much can be learned from the close reading of the phrases, sentences, and paragraphs that constitute an opinion (or other pieces of legal writing). Reading this book will undoubtedly make one a better lawyer, and teacher of lawyers. But the book's value and interest goes far beyond the legal profession, as it analyzes the way that rhetoric—in law, politics, and beyond—creates pictures and convictions in the minds of readers and listeners. --Sanford Levinson, author of Constitutional Faith Tony Amsterdam, the leader in the legal campaign against the death penalty, and Jerome Bruner, who has struggled for equal justice in education for forty years, have written a guide to demystifying legal reasoning. With clarity, wit, and immense learning, they reveal the semantic tricks lawyers and judges sometimes use—consciously and unconsciously—to justify the results they want to reach. --Jack Greenberg, Professor of Law, Columbia Law School X-Kit Literature Series: FET Macbeth

Nollekens and His Times
Grow old along with me/The best is yet to be, wrote Robert Browning in his poem "Rabbi Ben Ezra". Those of us approaching, or already inhabiting, this unknown land might not entirely agree, but in this inspiring volume by Dr Werman, we are shown how to make the most of old age, especially as regards our brains and how to use them to lead fulfilling lives. The book is packed with useful scientific facts on aging and how to differentiate between the symptoms of merely the "wear and tear" of our bodies and brains, and real disease. It is aimed at members of the general public, and contains fascinating real-life examples, some of them from Dr Werman's own practice as a neurologist and his life experience.

The Meaning of Life

The book analyzes, synthesizes, and evaluates the insights of the world's outstanding thinkers, prophets, and literary masters on the good, the morally right, and the lovely (part one); the question whether the world operates on the basis of such universal laws as the logos, the tao, and the principle of polarity (part two); what there is and isn't in the world, including such categories as existence, reality, being, and nonbeing (part three); and pre-eminently credible and enriching beliefs about truth, wisdom, and what it all means (part four). Emphasis is placed on the divergent views of such intellectual giants as Confucius and Laotse in ancient China; the classical Hindu philosophers from ancient times to Gandhi and Tagore; patriarchs and prophets quoted in Scripture; Socrates, Plato, and Aristotle; Saints Augustine and Thomas Aquinas in the Middle Ages; Descartes, Spinoza, Locke, Hume, and Kant; and nineteenth- and twentieth-century luminaries such as Bentham, Mill, Peirce, James, Dewey, Sartre, and Wittgenstein. The differences and resemblances of their cogitations are portrayed as a conversation of the ages on questions of persistent concern.
